REMARKS

Applicants request entry of this amendment in adherence with 37 C.F.R. §§1.821 to 1.825. This amendment is accompanied by a floppy disk containing the above named sequences, SEQ ID NOS:1-103, in computer readable form, and a paper copy of the sequence information which has been printed from the floppy disk.

The information contained in the computer readable disk was prepared through the use of the software program "FastSEQ" and is identical to that of the paper copy. This amendment contains no new matter.

The amendments to the "Conserved Residues" in "Table 8" on page 33, lines 31 and 36, were made to correct errors of a typographical nature made without deceptive intent. Justification for these can be found in related application USSN 08/159,339, page 47, lines 24-35, incorporated by reference on page 1, lines 4-8, of the instant application. The Examiner's attention is especially directed to lines 27 and 28, where "C-terminal conserved residue of phenylalanine (F) or leucine (L)" appears, and to lines 31 and 32, where "lysine (K), methionine (M) and asparagine (N) at position 5" appears. These positions coincide with the residues in "Table 8" corrected by these amendments and, thus, do not constitute new matter.
